INTENDED AUDIENCE:

This collection is for any male (regardless of whether he considers himself to be straight or gay or something else) who has fantasized about man-on-man behaviors involving **erotic cruelty**.

This phrase means: *Visual art which invites men to respond on a sexual level when viewing images of male characters.*

You will find that the creative works of Madeira Desouza incorporate **male erotic cruelty** which can arouse male viewers sexually when they view images or read stories of vulnerable and defenseless men in distress and jeopardy.

Sexual Arousal vs. Sexual Orientation: Sexual arousal of men always happens separately from their sexual identity or orientation. Men who understand and accept this truth set themselves free from guilt and shame to enjoy a richly rewarding life of erotic arousal and pleasure.

Some straight men actively seek erotic arousal by fantasizing about being taken advantage of and dominated by gay men.

Straight males who engage in such fantasies put themselves in mental images involving aggressive peril where they are forced by very dominant gay men to surrender and obey.

The ultimate erotic arousal outcome for such straight men is to orgasm against their will brought on by imagining being humiliated and shamed by gay men.
